## Registered Raspberries

Propagated by the Ohio Small Fruit Improvement Association. Almost disease free; every plant individually hand tipped, graded and dug by members of the Association under strictest inspection and regulations permitting 1% or less virus disease and not more than 1/4% of gall in parent plants. Spring Hill does not recommend you purchase these extra quality plants unless you can plant them away from uninspected raspberries. An isolated patch with proper care will far out-yield ordinary plants and remain healthy for years. We can supply Bristol, Logan, Cumberland and Giant Latham in registered plants.
